I am a tech enthusiast, explored every possible abstraction layers of CS and prefer to stay in the bottom layers, away from the general users and closer to the system. I find how two abstraction layers communicate with each other (IPC, API etc) interesting.

Education

- **Dhaka University of Engineering & Technology, Gazipur** *February 2018 - 2021*
  - B.S., Computer Science and Engineering (final semester)

Work experience (selected)

- **Ticket-BD (Failed Startup)** *Lead Back-End Developer, March 2015 - September 2017*
  - Coded raw **PHP**, had to do a bit of JavaScript (jQuery with ajax) on the front-end too.
  - Designed and implemented **databases** of Ticket-BD to sell Bus tickets online, designed **algorithms** to handle conflicts of buying the same ticket by multiple users

Technical Skills (selected)

- GNU/Linux systems (5+ years), WSL, CLI Applications, Version controlling - Git, SSH, OSI Layers, AWS (EC2, S3, Lambda), Open Source exploring, Software Licensing. I notice and enjoy other's design choices (UI/UX, System Architecture, Typography etc).

Leadership Experience (selected)

- **Vice President, Ex General Secretary - DUET Computer Society** *July 2021 - Jan 2022*
- **Senior Vice President - DUET Sports Club** *July 2021 - Jan 2022*

Awards

- **Champion of Intra-DUET English Olympiad** (2019, Became the champion of Intra-DUET English Olympiad held by English Language Club, DUET)

- **Talent Pool Scholarship** (2006, achieved this scholarship provided by Bangladesh Govt. on fifth grade)

Field of Interests

- Computer Systems, Core CS, World Peace, Mass/Public Education, Storytelling, Animal Conservation (Volunteered at https://www.instagram.com/creativeconservationalliance/ in this lockdown), Sports and Poetry will save us all one day, Chess, Math, Online forums (Hacker News, Reddit), Local and Global Economy and anything that stirs the intellectual interest
